ME CWCZ-21 x9 Antiaircraft Battery

(a) The Czechs manufactured enough T-72s to equip roughly six Tank Regiments by 1989. These tanks all seem to have gone to the Tank Divisions. The Motor Rifle Divisions do not appear to have received T-72s. Therefore, from Mid-1980s, may replace T-55 in Tank Divisions only with:

T-72 MK 125mm Command Main Battle Tank (c) CWWP-11 Alternatively, from mid-1980s: May replace T-55 tanks with upgraded models:

T-55 AM2K Command Main Battle Tank (c) CWWP-142

(b) While Czech Tank Regiments did not contain a Motor Rifle Battalion, it seems likely that they would have had at least one such company present.

(c) Command tanks (i.e. 'K' variants) do not have AAMGs and may not therefore conduct AA fire.

(d) Some sources say that Czechoslovakian Tank Regiments did not have a Regimental Artillery Group. However, it seems likely that in line with Soviet doctrine, they would have had at least one battery present.

(a) In Tank Divisions only: May replace OT-62 R2 Command Vehicle with:

BMP KSh Command Vehicle CWWP-65

(b) As in many Soviet units and particularly during the early 1980s, many regiments only had a single Tank Company.

(c) May replace with Mortar Battery (FSE CWCZ-05).

(d) In BMP-equipped regiments (Tank Divisions) only: May replace with SP Field Artillery Battery (FSE CWCZ-02).

(e) Some sources state that a full battalion of artillery was held by each Motor Rifle Regiment, but this may be optimistic. One source suggests that a 120mm Mortar Battery (FSE CWCZ-05) might have been present instead.

(a) As in many Soviet units and particularly during the early 1980s, many regiments only had a single Tank Company.

(b) May replace with Mortar Battery (FSE CWCZ-05).

(c) Some sources state that a full battalion of artillery was held by each Motor Rifle Regiment, but this may be optimistic. One source suggests that a 120mm Mortar Battery (FSE CWCZ-05) might have been present instead.

22nd Czechoslovakian Airborne Regiment is hard to come by. What I do know is that the regiment comprised two Parachute Battalions (plus a Special Ops Battalion - not included here). but no airborne mechanised infantry as per the Soviet model (Czechoslovakia did not possess any BMD Airborne Assault Vehicles). I have therefore based this BG on the Soviet Airmobile Brigade organisation, which was a pure paratroop organisation, with only light support elements. However, the regiment was seen on parade mounted in OT-64 APCs, so its possible that they held such equipment for non-airborne missions.

(b) May replace commander's transport with: OT-65 VP Command Vehicle

(b) AGS-17s are only available from mid-1980s onward.

(a) The 22nd Airborne Regiment was seen parading in OT-64 Armoured Personnel Carriers on at least one occasion. While this was possibly just for show, it is entirely possible that when deployed in a non-airborne role, they could have been equipped as a Motor Rifle Battalion (Wheeled), as per BG CWCZ-09. The Soviet Paras certainly did such things in Afghanistan during the 1980s and again in Chechnya and the Former Yugoslavia during the 1990s.

(b) AGS-17s are only available from mid-1980s onward.

(a) T	he C	zechs manufactured enough T-72s to equi	in roughly siz

Tank Regiments by 1989. These tanks all seem to have gone to the Tank Divisions. The Motor Rifle Divisions do not appear to have received T-72s. Therefore, from Mid-1980s, may replace T-55 in Tank Divisions only with:

T-72 M 125mm Main Battle Tank (c) CWWP-11 Alternatively, from mid-1980s: May replace T-55 tanks with upgraded models: T-55 AM2 100mm Main Battle Tank (c) **CWWP-142** 

(b) Czech Tank Battalions generally operate as single MEs. However, one company of **x6** tanks may be detached from each Tank Battalion as a separate ME (designate one tank as the Company Commander).

(c) Regimental and Battalion Command Tank ('K') variants do not have AAMGs and may not therefore conduct antiaircraft fire.

(a) From mid-1980s: May replace T-55 tanks with upgraded models:

T-55 AM2 100mm Main Battle Tank (c) CWWP-142

(b) Czech Tank Battalions generally operate as single MEs. However, one company of x4 tanks may be detached from each Tank Battalion as a separate ME (designate one tank as the Company Commander).

(c) Regimental and Battalion Command Tank ('K') variants do not have AAMGs and may not therefore conduct antiaircraft fire.

(d) Late 1980s: Fifth company added. Increase to **x20** tanks plus **x1** command tank.

## MANOEUVRE ELEMENT CWCZ-04 Motor Rifle Company (Tracked)

-	Command 1 Commander	CWWP-103
	1 SA-7 'Grail' SAM Team <b>(a)</b>	CWWP-99
L · ×	9 Early Motor Rifle Infantry (3 RPG) (b)	CWWP-105
▶• т ⋈ х	ransport <b>4</b> OT-62 A Armoured Personnel Carrier <b>(c</b>	<b>:d)</b> CWWP-40

(a) Mid-1980s: May replace SA-7 'Grail' SAM with: SA-16 'Gremlin' SAM Team

(b) The Czechs persisted in older small-arms designs and did not adopt a LAW. They also used the home-grown P-27 112mm rocket launcher in lieu of the RPG-7V, which was similar in most respects. The Early Motor Rifles Card therefore best suits Czech Motor Rifles.

**CWWP-100** 

(c) May replace OT-62 APCs with:	
OT-62 B Armoured Personnel Carrier	CWWP-41
OT-62 C Armoured Personnel Carrier	CWWP-42
Or in Tank Divisions with:	
BMP-1 73mm Infantry Combat Vehicle	CWWP-34
Or from mid-1980s with:	

BMP-2 (Warpac) 30mm Infantry Combat Vehicle (d) CWWP-37 Or in 1989 with:

OT-90 14.5mm Infantry Combat Vehicle (f) CWWP-164

(d) Note that when BMP-1 was introduced, whole regiments were converted to BMP en masse rather than piecemeal replacement of vehicles, as there were organisational and tactical changes associated with the new BMP concept. However, when BMP-2 was introduced, they tended to replace BMP-1s piecemeal – a company or a battalion at a time. Therefore, a battalion might have two companies with BMP-1 and one company with BMP-2.

(e) A clause in the CFE Treaty resulted in BMP-1s being classed as 'tanks' due to their 73mm gun. As a result, Czechoslovakia was required to reduce her holdings of tanks and BMP-1s. In order to evade this treaty requirement, a large number of BMP-1s were refitted with OT-64 turrets, thus creating the OT-90.
